

SOUND ISOLATION ENCLOSURES

About to celebrate their 20th anniversary, WhisperRoom™, Inc., is excited to be back at AES for 2009! WhisperRoom, the leader in sound isolation technology, manufactures sound isolation booths for the recording and broadcasting industries. Since their last exhibit to AES, they have made quite a few design changes. The most significant change enables clients to assemble the WhisperRoom completely from the interior. Older models were equipped with straps and required space around the WhisperRoom for assembly. Now, complete assembly can be accomplished from the interior with hinged brackets connecting the ceiling and floor to the walls and eliminating the need for straps and additional space.

WhisperRoom™, Inc. offers 20 sizes and two levels of sound isolation, a Standard (single wall) and an Enhanced (double wall). All models are upgradeable from a Standard to an Enhanced at any time, in order to accommodate clients' ever-changing needs. Sizes range from a modest 3.5' x 2.5' one-person unit to a room-size 8.5' x 15.5' unit. Most models are also expandable in length in various increments depending on the model. Whether you're a television network, radio station, university, government agency, or home recording studio, there is a WhisperRoom that's perfect for you.

Included with all WhisperRooms are basic ventilation systems with a remote switch, a door window, Auralex® acoustic foam sheets, and an interior light. They also offer a variety of optional features as well. On exhibit is the MDL 4848E (4' x 4') with the optional Caster Plate, a 26" x 36" Wall Window, Ventilation Silencing System, and Exterior Fan Silencer.

In most cases, WhisperRooms can ship within 48 hours of purchase and they offer a 5-year manufacturer's warranty, the best in the industry. Educational discounts, monthly specials and GSA pricing are available.

Reducing sound to a Whisper since 1990!
